Management Context

The first months of 2026 were defined by disciplined execution under constrained resources.

The interim net result was EUR -4,575.68 and should not be interpreted as a full-year forecast.

Source-backed records indicate EIC Pre-Accelerator selection with potential support of up to EUR 500,000, while final payment terms were not confirmed in the reviewed source set.

Priorities for the next period are to confirm grant-payment terms, maintain working-capital discipline, consolidate clinical analysis, and preserve conservative public claims.

Evidence Boundary

The reviewed source set does not establish unsupported revenue, customers, investments, valuation, regulatory authorization, or clinical deployment.
