BreastScreening-AI Recognized as a 2024 WIPO Global Awards Finalist

BreastScreening-AI was recognized as one of 25 finalists in the 2024 WIPO Global Awards, selected from 667 applications submitted across 107 countries.

PROGRAM	WIPO Global Awards 2024
RECOGNITION DATE	12 July 2024
CATEGORY	Startup - ICT
STATUS	Finalist; not listed among the nine winners

25 Global finalists	667 Applications	107 Countries represented
------------------------	---------------------	------------------------------

Detailed Announcement

- The World Intellectual Property Organization listed BreastScreening-AI among the 25 finalists in the 2024 Global Awards.
- The finalist group was selected from 667 applications originating from 107 countries.
- WIPO described BreastScreening-AI as a Portuguese startup in the ICT category and highlighted its multimodal breast-imaging approach and patented computational methods.
- Nine companies were subsequently named winners. BreastScreening-AI's documented status is finalist, and the communication does not imply receipt of a winner's prize or mentoring package.

Investor Relevance

Finalist recognition from WIPO is a material signal regarding the project's intellectual-property strategy and international visibility. It supports the strategic relevance of the patent portfolio, while leaving patent scope, freedom to operate, commercial value, and enforceability as separate diligence matters.

Source Basis

- World Intellectual Property Organization 2024 finalist listing and awards record.
- Portuguese Institute of Industrial Property announcement dated 12 July 2024.

Information Not Established

- BreastScreening-AI was a finalist and was not listed among the nine 2024 winners.
- The recognition does not establish patent grant status in every market, freedom to operate, product authorization, customers, or investment proceeds.
